

I am staying at home  
today.

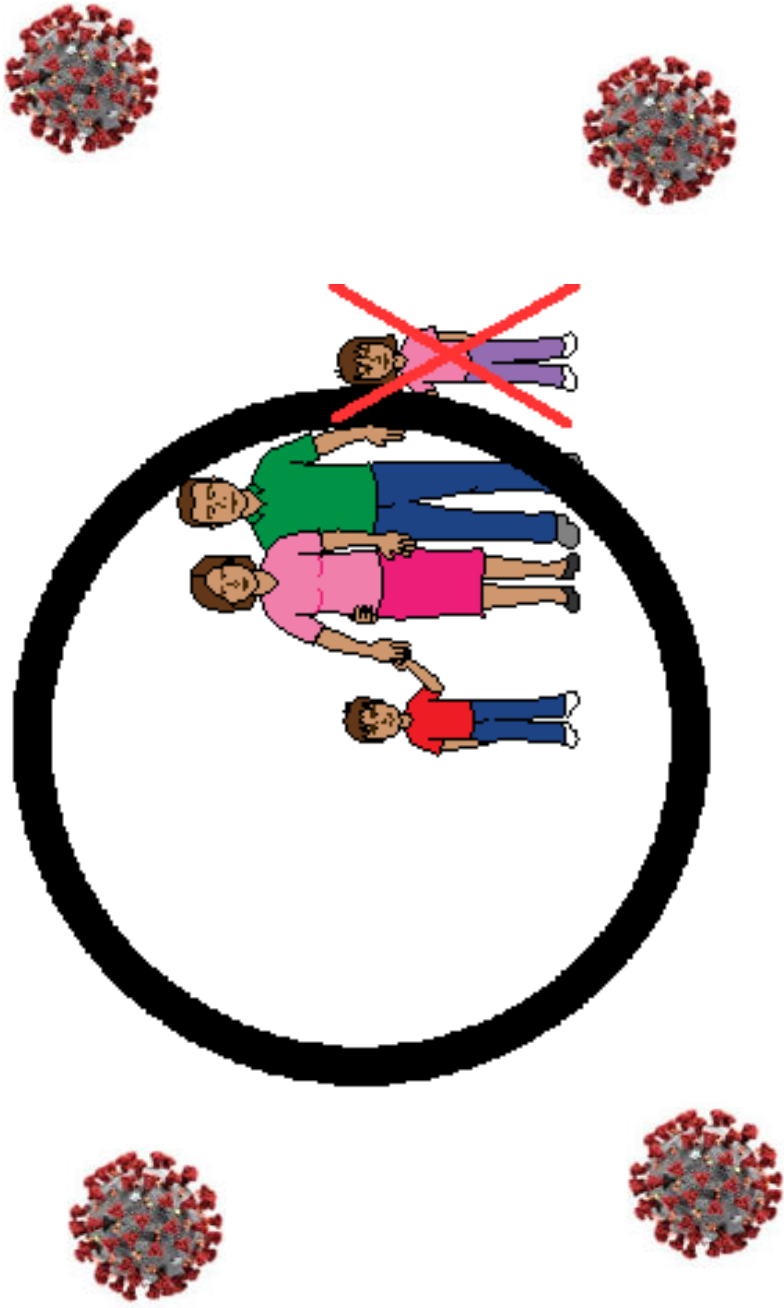

I stay at home because of a virus going around that can make me sick.

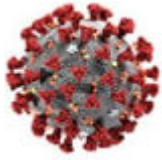

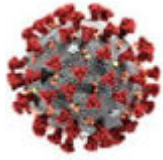

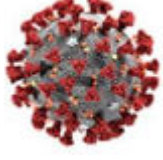

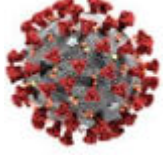

I can stay in a bubble that will protect me from the virus.

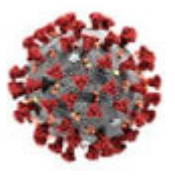

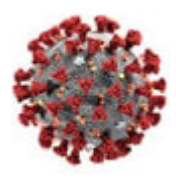

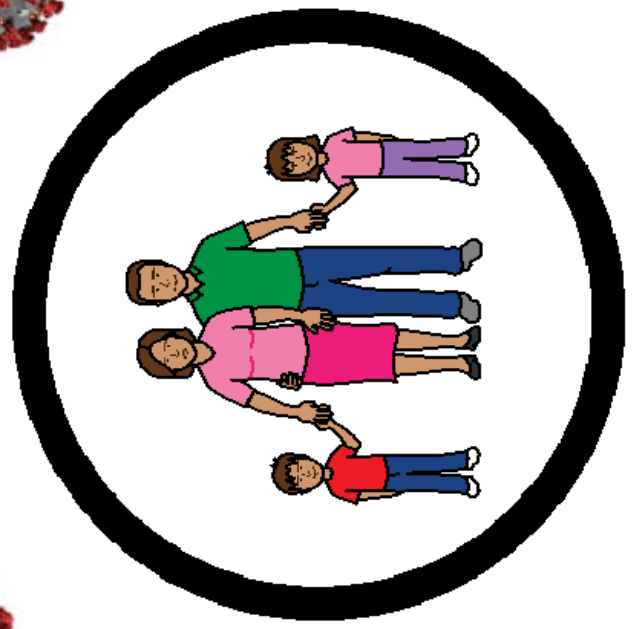

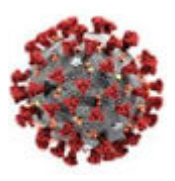

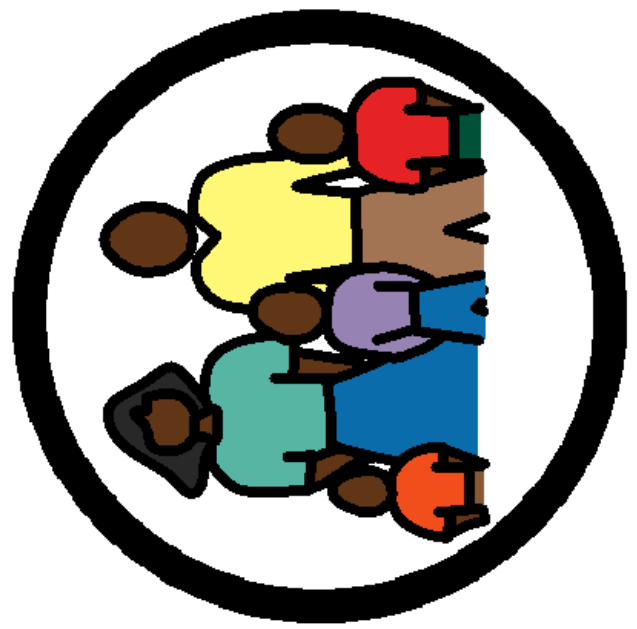

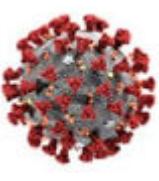

My family and the people I live with will also stay with me in our bubble.

It is important that I don't leave my bubble.

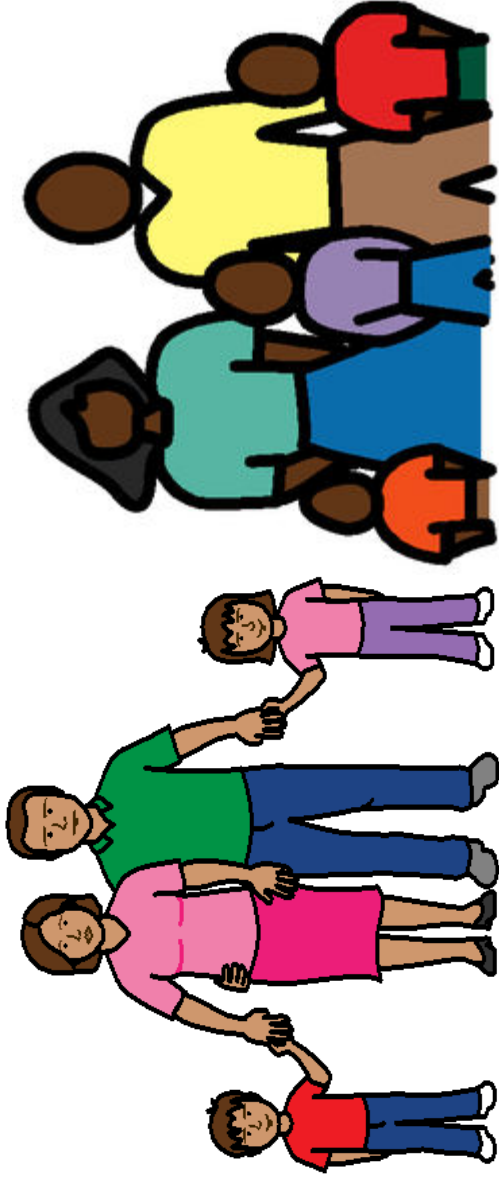

My friends also live in a bubble. They will also stay in their bubble with their family.

Staying in our bubbles will keep us safe.

Once the virus is gone we don't have to stay in our bubbles any more.
