Workshop content

This workshop will focus on:

- AAC for adults with speech impairments (MND, dysarthria, apraxia, Gillian-Barre, MS, Parkinson's, etc) including voice banking
- AAC for adults with language impairments (aphasia, TBI, PPA, brain tumor, dementia, Huntington's disease, etc)
- AAC in acute settings
- Alternative access methods, e.g. partner assisted scanning, switching, eye pointing, etc
- Tips for communication success
- How can TalkLink support with complex clients?

Lots of practical tools, resources, tips and tricks will be shared. Electronic versions of resources will be sent out following the workshop.
